

Turn to safer abrasives

Reduce your personal liability risk.

The Symbol of Safety

Organization for the Safety of Abrasives

At oSa[®] everything revolves around your safety

Take a stand against cheap imports offering uncertain safety.

The entire production process for abrasive tools is monitored.

✓ YES!

The works must have a certified QM system.

✓ YES!

Works inspections are obligatory before companies can join oSa[®].

✓ YES!

The producer constantly checks production according to EN standards.

✓ YES!

The abrasive tools are traceable all the way back to the producer.

✓ YES!

The member works are committed to ethical guidelines as well as maximum safety at work and environmental protection.
